CAT IN A HAT raced keenly in the early stages. MATADOR when questioned regarding the poor performance, rider explained that the gelding had not travelled well at any stage throughout running and raced in a flat manner. A post race Veterinary examination revealed the gelding to have Cardiac Arrhythmia. Trainer representative was advised that the gelding would require a Veterinary Certificate of Soundness prior to trialling and would have to trial to the satisfaction of the Stewards before racing again. Trainer's representative advised that the gelding would now be spelled. Returned with a minor laceration to the off hind hoof wall. MOODOMETER raced wide throughout. When questioned regarding the disappointing performance, rider explained that although the mare was obliged to race wide throughout it had commenced to tire prior to straightening. A post race Veterinary examination revealed no abnormalities. Trainer advised that the mare was having only its second start in a period of twelve months and at this stage of its preparation was not suited to racing wide throughout and he would now assess how the mare recovered with a view to starting it in a race in two weeks time. TALK TO THE WALL raced wide on straightening. COMMANDMENTS slow into stride. Held up on straightening and again between the 250m and the 150m and was held tight over the concluding stages.
