STEWARDS ADVICE:
During the track inspection carried out by Stewards at approximately 4pm, a fault with the opening of the 380M boxes was detected. Following notification to WAGRA track staff, it was established that the exhaust valve was faulty and required replacement. Two different exhaust valves were fitted and on both occasions the boxes were tested and failed to function properly. After considering the matter, Stewards determined to abandon all 380M starts and continue with the race meeting as scheduled. All weights from the 380M starters were deleted.
