

GREYHOUND DNA & MICROCHIPPING

Greyhound DNA

1. Obtain an 'Application for DNA fingerprinting of a Greyhound' from RWAA or Greyhounds Australasia (GA)
2. Submit the completed form to GA with the prescribed fee, currently \$180
3. Follow the instructions and process as prescribed by GA, noting that it is a requirement to have a RWAA registered vet take the DNA sample. (Refer to approved Vet list)
4. Please allow 6 weeks for the results to be returned
5. On completion, you will receive a numbered certificate for your records. (RWAA is notified by GA and this certificate number is recorded in our Data base)

Please note that all breeding greyhounds must have DNA certification, in order and prior to, any breeding activity.

Greyhounds Australasia

Location

Sandown Greyhound Racing Complex
Lightwood Road Springvale VIC 3171

Postal Address

PO Box 239,
SPRINGVALE VIC 3171

Microchipping

All greyhounds whelped after 1 January 2011 must be microchipped by a RWAA Approved Veterinarian (refer to approved veterinarians list) between the age of 6-12 weeks as a requirement for litter registration. Microchips will be provided direct to breeders by RWAA, upon lodgement of the 'Whelping Notice' (Form D) and sent to the registered breeder along with the 'Application for Registration of a Litter' (Form E).

Microchip insertion must be completed by a RWAA approved veterinarian (6-12 weeks) prior to the RWAA Stewards attending for the litter registration.

Queries regarding microchipping can be directed to (08) 9445 5558.

Clinic	Address	Contact	Vet	Approved For
