GRADING REVIEW PANEL MEETING

At the recent GRP meeting the main topics of discussion can be summarised below.

Unfulfilled Commitments Policy

At the last Grading Review Panel meeting it was agreed that the current unfulfilled commitment policy where they only apply to distances 302m and below would be maintained.

Industry members requested that this policy be looked at.

Unanimous agreement was reached by the panel to leave this policy as is.

302m and below population is being managed effectively.

Agreed that 380m and above greyhounds have ample opportunities each week for starts, provided they are nominated appropriately.

Outs to Drop a Grade

At the last Grading Review Panel meeting it was decided to maintain 2 outs to drop a grade in City and Provincial class and maintain the traditional 3 outs in Country class.

After a 2 years of this model being used, the expected outcome of less races being conducted in Provincial 3 & 4 and City 4 grades has eventuated.

A flow on from this was the minimum field size in Sprint FFA races being dropped to 5. This was initially done as a 6 month trial but has now been adopted as policy.

Industry members requested that this policy be looked at.

The Panel decided to implement a system that applies across all 3 classes of racing where Grades 1,2,3 have 2 outs to drop a grade and Grade 4 have 3 outs to drop. (Country Grade 5 will remain 3 outs to drop back to a Grade 6).

An implementation date will be dependent on OzChase development works and will be advised once known.

City Class Novice winners in Country Grade 5 races

Industry members requested that a policy or grade restrictions be applied to City Novice winners being entered into Country Grade 5 races straight out of winning City Novices.

The panel discussed various options and scenarios in regards to City Novice winners and their eligibility for Country Grade 5 racing straight out of winning these races.

It was agreed that they will remain eligible for Country Grade 5 racing, however it was decided to trial some race meetings to be designated as no City Winners in their last 10 starts.

Initially on select Thursday and Monday meetings.

NEW BRAND LAUNCH FOR GREYHOUND RACING

Greyhounds have joined standardbred and thoroughbred horses today with the launch of a new brand which brings the racing family of Western Australia together.

Racing and Wagering Western Australia (RWWA) proudly introduces the greyhound racing brand – The Dogs WA.

The move forms part of RWWA's strategy to market and promote greyhound racing across the state.

Greyhound racing has long been known as the dogs and this familiar name has been adopted into the new brand, alongside the informal names embraced for harness and thoroughbred racing brands – The Trots WA and The Races WA.

General Manager Racing Charlotte Mills said The Dogs WA brand would be applied across multiple initiatives.

"The dogs is a phrase commonly used in greyhound racing, which makes the new brand easily recognisable to the wider community," Charlotte said.

"The excitement of greyhound racing is enjoyed by many West Australians and this new brand will support marketing initiatives.

"Greyhound racing is responsible for contributing more than \$105 million to the Western Australian economy and generates around \$88million in direct spending.

"Even more importantly, 3700 people are directly involved, which is far more than a sign of the economic value the dogs bring to Western Australia. It shows the interest and significance the dogs have for many people."

Western Australia has three greyhound racing venues, which host more than 350 race meetings each year.

Following the launch of the new brand, the RWWA greyhound Twitter handle will become The Dogs WA.

GREYHOUND INJURY FULL RECOVERY SCHEME (GIFRS)

Under GIFRS the ownership of a greyhound sustaining an eligible injury at a race meeting, or official trial, is transferred to RWWA's Greyhounds as Pets (GAP) program, following which the injured greyhound is transported to emergency care and all associated costs of surgery and rehabilitation are covered by RWWA. If suitable, the greyhound will then be rehomed post recovery through GAP's standard processes.

This scheme complements the Greyhound Injury Surgery Rebate (GISR), where RWWA offers a financial contribution, for eligible cases, to help the trainer and owner pay for the costs of veterinary care.

Norethisterone for the control of oestrus in females to be introduced as an exempted substance into the Greyhounds Australasia Rules

Notice to trainers – Norethisterone usage in greyhounds

On 1 March 2018, Greyhounds Australasia will introduce norethisterone to the list of *Exempted Substances* within GAR 1 Definitions as follows:

“Ethyloestrenol or norethisterone when administered orally to a female greyhound and where it has been prescribed by a veterinary surgeon for the sole purpose of regulating or preventing oestrus in that female greyhound.”

Female greyhounds are unable to race whilst in season, which can occur up to twice a year and reduce their available racing career. Since the introduction of a ban on previously used anabolic androgenic steroids (AAS), oestrus control has been limited to the use of ethyloestrenol. Following a review, including research with The University of Nottingham and the Greyhound Board of Great Britain where norethisterone is used successfully, Greyhounds Australasia has agreed to allow norethisterone as an alternative non-AAS means of postponing oestrus in females.

Participants are encouraged to discuss with their veterinarian the options available for regulating or preventing oestrus in their greyhounds in order to make an informed decision. Options available include no treatment (allow natural cycling), spaying (permanent surgical option), or medication with ethyloestrenol or norethisterone.

Norethisterone is a synthetic form of progesterone and belongs to a class of drugs known as progestins, and is commonly used in human contraceptive pills. Progestins prevent oestrus by inhibiting the hormone that causes ovulation i.e. they act on the pituitary gland to reduce its responsiveness to gonadotrophin releasing hormone (GnRH) and blocking the effect of oestradiol on GnRH receptor expression. This leads to a suppression of reproductive cyclicity and prevents oestrus.

From a survey of UK trainers, norethisterone effectively and temporarily postpones oestrus in most females, but some side effects were reported including frequent urination, clitoral enlargement or a behaviour change. A separate review of performance data found that greyhounds performed up to one length slower if treated with norethisterone. These are similar to those side effects reported when using ethyloestrenol and were less likely at decreased doses (2.5mg/day compared to 5mg/day). The performance decrease found is similar to that seen when progesterone is naturally elevated during a normal oestrus cycle.

There are two products that are registered with the Therapeutic Goods Administration (TGA) that contain only norethisterone - Primolut NTM and Noriday 28 DayTM. Given the low dose contained in the latter product, Primolut NTM is likely to be an easier and more economic method of controlling oestrus for trainers. The cost per day of ½ - 1 tablet once daily of Primolut N is similar to ethyloestrenol at 45 - 90 cents.

Many products contain norethisterone in combination with other substances (e.g. ethinylestradiol - *an oestrogen not to be confused with ethyloestrenol*) - these additional substances are not exempted from being a prohibited substance and can cause a positive swab. Trainers administering these combination products do so at their own risk.

There are no longer any Australian Pesticides and Veterinary Medicines Authority (APVMA) registered products containing ethyloestrenol available in Australia. There is however one product containing ethyloestrenol (Orabolin) which has been produced under APVMA permit for several years. Until a fully registered product returns to the market, the reliable ongoing supply of ethyloestrenol may be at risk.

Like ethyloestrenol, norethisterone must only be used for the purposes of regulating or preventing oestrus and can only be prescribed by a registered Veterinary Surgeon to an animal under his or her care after establishing a therapeutic need for that substance. That veterinary surgeon would be prescribing the product '*off-label*' as neither substance is registered for the control of oestrus in canines. The product must be labelled in accordance with regulatory legalisation.

As both exempted substances are a Schedule 4 (Prescription Only) substance, trainers are reminded of their obligations under GAR 83A Raceday Treatment (i.e. do not administer on the day of an event until home after racing) and under GAR 84A Treatment Records (i.e. record administrations to each greyhound in their treatment book).

For further information please contact your state controlling body.
