NORTHAM AVON VALLEY CHALLENGE FEATURE RACE

The Northam Monday 22 May race meeting has the one-off \$5,750 to the winner Avon Valley Challenge feature race over 721m scheduled on it.

As a lead up to this feature race there is a Country FFA 721m race scheduled on Monday 15 May.

This meeting is a no City win designated one, however this will be waived for the FFA 721m race.

Both these races are Country class, if your greyhound doesn't have a Country Distance Grade allocated to it then please contact the Grading Office and one will be added to it.

FROM THE RACING MANAGER

PREFERENTIAL BOX DRAW PROCESS

A trial will be initially conducted over the 275m distance at Cannington.

Initial race types offering a PBD option will be Maiden and Novices.

Specific races at a meeting will be designated as PBD and for these races **trainers will have to contact the Grading office directly on the phone to nominate for them.**

For a greyhounds first race under PBD conditions the trainer will nominate the early running trait.

Early running traits will be:

- Railer (R) – dogs that angle left at box rise
- Straight (S) – dogs that run straight at box rise
- Wide (W) – dogs that angle right at box rise

After this first nomination and subsequent race start, the early running trait of a greyhound will be reviewed by the Grading Office and any changes will be made solely by the Grading office based on head on footage and racing pattern. Any change will be advised to the trainer.

Greyhound fields will be determined based on the current Grading policy rules.

Once a field has been created the early running traits of each greyhound in the field will be grouped and a manual box draw will be conducted. For example, in an 8-dog field, if 5 greyhounds are designated as Railers, 1 greyhound as Straight and 2 as Wide, then Boxes 1-5 will be drawn for the Railers, Box 6 will be allocated for the Straight and boxes 7-8 will be drawn for the Wides.

The Manual box draw process will be conducted by the Grading office with an independent person acting as an observer.

No reserves will be graded into PBD races.

A redraw will not be conducted with respect to the PBD for reasons of incorrect box allocation unless a wide runner is incorrectly drawn from the railers's position or vice/versa.

After the first nomination and subsequent race start, the early running trait of a greyhound will be reviewed by the Grading office and with the approval of the Stewards may be amended with the trainer advised accordingly.

Unless amended following review by the Grading office and Stewards, an application for an amended running trait from the trainer will not be considered for a period of at least three starts.

UPCOMING PREFERENTIAL BOX DRAW RACES

Tuesday 2 May 275m MDN & NOV

Tuesday 9 May 275m MDN & NOV

Tuesday 16 May 275m MDN & NOV

Tuesday 23 May 275m MDN & NOV

Tuesday 30 May 275m MDN & NOV

Race programs will provide options for MDN & NOV 275m race types at other meetings for those that do not wish to nominate for PBD races.

ADVICE ON THE EXPORTATION OF GREYHOUNDS

RWWA has been made aware of person/s contacting registered participants (predominantly in other States), via phone call, SMS and across social media enquiring about the purchase of greyhounds for export to China.

RWWA strongly opposes the export of Australian greyhounds to any country that does not have strong animal welfare controls and greyhound racing regulations in place.

Under Greyhounds Australasia (GA) rule 44 (1) any person exporting a greyhound(s) to another country must prior to meeting the requirements of the Department of Agriculture, Fisheries and Forestry to obtain a Greyhound Passport from GA.

GA Greyhound Passports will not be issued for exporters of greyhounds to countries that don't meet such standards. China is one of those destinations for which a GA passport will not be issued.

It is also an offence under the Rules for any person to sell or otherwise transfer a greyhound to another person in circumstances where they are aware or should reasonably be aware that the greyhound will be or is likely to be exported.

Participants are therefore warned not to engage with any such unsolicited approaches and instead bring it to the attention of the RWWA Stewards via email RWWAGreyhoundStewards@rwwa.com.au or phone 9445 5237.

NOTICE TO INDUSTRY

SWAB CLEARANCES AND PRIZEMONEY WITHHOLDING THRESHOLDS

Due to various reasons, the reporting of samples by the Chemistry Centre to RWWA is currently experiencing delays outside normal timeframes.

These delays are not impacting the methods or process of analysis but combined with the higher volumes of samples during carnival times, there are some delays in the interpretation of data generated from the screening process which is impacting reporting timeframes.

We have recently completed a review of the applicable thresholds where prize money payments to an animal is withheld pending clearances of swabs. A revised threshold for harness and greyhound placings of \$40,000 is now applicable.

In view of the current delays, it has been determined to retrospectively apply these thresholds to any samples taken previously. It is hoped this will alleviate some of the pressures being experienced by impacted stakeholders in the meantime.

The release of any such prize monies should therefore not be interpreted as evidence of the swab being declared negative.

The Chemistry Centre has advised that it is adopting measures to overcome the current backlog of clearances which we will continue to monitor so that remaining prize monies being withheld can be released as soon as possible once those samples are cleared and timelines return to normal.

SCREENING LIMITS NOTICE TO GREYHOUND RACING PARTICIPANTS AND VETERINARIANS

Greyhound racing participants are advised to make themselves aware of Greyhound Rule of Racing 146 which is titled Therapeutic Substances and Screening Limits and states in part;

(6) The following screening limits apply:

(a) butylscopolamine at a mass concentration of 1 nanogram per millilitre in a sample of plasma or 10 nanograms per millilitre in a sample of urine

(b) carprofen at a mass concentration of 20 nanograms per millilitre in a sample of plasma or 5 nanograms per millilitre in a sample of urine;

(c) dexamethasone at a mass concentration of 200 picograms per millilitre in a sample of plasma or urine;

(d) firocoxib at a mass concentration of 2 nanograms per millilitre in a sample of plasma or urine;

(e) flunixin at a mass concentration of 1 nanograms per millilitre in a sample of plasma or 50 nanograms per millilitre in a sample of urine; and

(f) meloxicam at a mass concentration of 5 nanograms per millilitre in a sample of plasma or 2 nanograms per millilitre in a sample of urine

A screening limit is the urine or plasma concentration adopted for the screening of a specified therapeutic prohibited substance. These screening limits set out the concentration of the therapeutic substance in urine or plasma above which the racing laboratory will call the sample positive. Screening limits are simply the detection limits to be used by the laboratories when screening for certain therapeutic substances as instructed by the authorities; they are not international thresholds.

The publication of a screening limit, or therapeutic medication detection times arising from limited administration studies, does not replace the need for trainers to obtain specific professional veterinary advice with respect to the treatment of their animals to ensure they comply with the obligations to present runners free of any prohibited substances.

Trainers and Veterinarians are further advised that any such advice provided or received in relation to appropriate withholding periods for therapeutic medications prior to competition should always be conservative in nature and make allowance for individual variations between animals, and factor into account variable treatment dose rates and dose schedules.

The implementation of screening limits in racing is not intended and does not operate to mean that for the purpose of the Rules of Racing the therapeutic substance only becomes a prohibited substance when the screening limit is exceeded.

It shall not be a defence to any charge the relating to the presentation of a racing animal with a prohibited substance present that the initial screening test should have been below the screening limit for the therapeutic substance in question.

In making any decision regarding the administration of a prohibited substance to an animal that is entered to race, participants are reminded of their responsibility in undertaking the appropriate level of due diligence and risk analysis in researching the available information, including the seeking of veterinary advice and applying adequate safety margins to account for biological variability.

A "detection time" is not the same as a "withdrawal time". A suitable safety margin dependent upon various factors including, but not limited to dose, length of treatment, route of administration and other relevant factors including allowance for biological variation between animals must be considered when calculating withdrawal times. To ensure the rules of racing are not breached, in adopting withdrawal times a conservative approach should be taken and include specific veterinary advice in that regard. Where in doubt, participants and Veterinarians should contact the RWWA Veterinary department to ensure any proposed treatments are appropriate given the Rules of Racing.

QUALIFYING TRIALS

All Qualifying Trials are conducted prior to the first race at the respective race meetings, unless otherwise advertised. The number of Qualifying Trials drawn may vary depending on the number of races drawn and the number of spare kennel bays.

Should nomination numbers warrant, consideration may be given to conducting trials on the backup days of Thursday (Mandurah) and Saturday (Cannington) utilizing surplus nominations. Alternatively a stand-alone Qualifying Trial session may be considered.
